

PRIVACY (GDPR) AWARENESS TRAINING

The way we treat personal data has changed for ever. Are your employees aware?

GDPR: new opportunities, new obligations

The new Regulation gives citizens more control over how their personal data is processed. It establishes a uniform framework for data protection legislation across the EU. Your business no longer needs to comply with multiple, often differing, regulations - you only need to conform to the GDPR in order to offer your services anywhere in the EU.

However, the Regulation also imposes a variety of new obligations on your business, your procedures, your systems and your employees. Do your employees understand how to recognize and report a data breach? Do they understand the various subjects rights? Are they familiar with new terms such as "Data Protection Officer", "Data Privacy Impact Assessment" and "record of processing activities"? Do they understand what obligations and restrictions exist when sharing or processing personal data as part of their work tasks?

How we can help

BDO's Cyber Academy has developed a unique programme to suit your privacy awareness needs. Our programme sets employees up for success, by instilling best practice knowledge and practical know-how regarding the various rights and obligations imposed by the Regulation. Through integrated communication and engaging instructor-led training, BDO can help your employees effectively understand GDPR and significantly reduce your exposure risk. Our tailor-made, interactive, sessions can help towards your company's regulatory compliance, and can also help mitigate the risk of disciplinary action taken against you, either by the Data Protection Authority, or by a court of law.

WHY BDO FOR YOUR TRAINING NEEDS?

- ▶ Do not expect your typical training session. Our interactive course guarantees that participants are actively engaged and motivated, ensuring the best learning result.
- ▶ Our experienced instructors have trained over 5.000 individuals.
- ▶ Our team includes professionals with a wide range of professional qualifications, including CISSP, CISA, CEH, CIPP/E, EDRP & Security+

BENEFITS

- ▶ Increases privacy awareness level of employees.
- ▶ Empowers employees to use proper judgement when dealing with subjects' requests.
- ▶ Unfolds complex terms and introduces new obligations.
- ▶ Streamlines the organizational compliance efforts and creates a culture of privacy.
- ▶ Can be used towards demonstrating organizational compliance with GDPR.
